

FAST PACED BAG BUILDER SIMULTANEOUS RACING

In Rev it Up, players will take control of 1 of 8 unique and assymmetric racers. Players will simultaneously pull chips from a bag to move their racer forward, or trigger other effects. Movement usually comes with the cost of heating up your engine, and if you're not careful, you'll overheat. Use weapons scattered on the track and build the best engine to be the first to cross the finish line.
